About me

MERN Stack Developer with 1 year 3 months of practical experience. Experienced in developing full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Strong knowledge of REST APIs, backend architecture, and responsive UI development. Proven ability to build and deploy production-level applications with a focus on performance, scalability, and clean code practices.

Technical Skills

Frontend : HTML | CSS | JavaScript | React.js | Responsive Design | Tailwind CSS

Backend : Node.js | Express.js | REST APIs | Authentication & Authorization | API Integration

Database : MongoDB | Mongoose | SQL

Others : Next.js | Git & GitHub | Docker (Basic) | Redis (Caching) | BullMQ | JWT | Deployment

Experience

Techify House | MERN Stack Developer | Feb 2025 – Present

- Built a **scalable construction management web application** using **React.js, Node.js, Express.js, and MongoDB**, handling **project tracking, workforce management, inventory control, and financial operations** within a unified system.
- Implemented **role-based access control, RESTful APIs, responsive user interfaces, real-time updates, and interactive dashboards** to improve coordination, transparency, and decision-making.

MoveoApps IT Solution | Frontend Developer intern | Dec 2024 – Feb 2025

- Developed **responsive and user-friendly web interfaces** using **HTML, CSS, JavaScript, and React.js**, ensuring **cross-browser compatibility** and optimal performance.
- Improved **UI consistency**, fixed bugs, and optimized **application performance** to enhance overall usability and responsiveness.

Projects

Construction Sarthi | React.js, REST APIs, AI Integration

- Developed responsive web interfaces using **React.js, HTML, CSS, and JavaScript** for a multi-role construction management system with **role-based access control** and modular architecture.
- Integrated **RESTful APIs** for project tracking, workforce, finance, inventory, and site monitoring to ensure seamless frontend–backend communication.
- Implemented **AI-powered features** for automated report generation, cost estimation, timeline predictions, and material calculations to reduce manual effort and improve operational efficiency.

Aussie Mate | React.js, Node.js, Express.js, MongoDB

- Developed and maintained the **Admin Panel** using **React.js** and built secure **RESTful APIs** with **Node.js and Express.js** to manage users, service providers, bookings, payments, and platform operations.
- Designed backend logic for **job-provider matching, quotations, booking workflows, commission management, and reputation system**, ensuring smooth system administration and real-time data handling.

Media Savebox | mediasavebox.com | Next.js, Node.js, Express.js, MongoDB, Redis, Docker

- Developed a **full-stack video downloading platform** using **Next.js and Node.js**, enabling users to download and stream videos with optimized performance and seamless user experience.
- Implemented scalable **RESTful APIs**, background job processing, and caching mechanisms using **Redis** to handle parallel audio-video processing and improve response time.
- Designed efficient backend architecture with **MongoDB** for metadata management and used **Docker** for containerization and streamlined deployment.
